

## Lesson Five

# Petitioning The Angels Directly

Up until now you have been working your angelic magic *through* either the Archangel Gabriel or the Shekinah. These are always excellent methods for performing your magic. One of the benefits of working with Gabriel and/or Shekinah energies is that because your petitions are coming through these energies rather than with the other angelic spheres directly, the time it takes for results to appear can be reduced; however, we will now learn how to petition each angel directly. Working in this manner can give you much more powerful results, even though occasionally the time it takes for results to manifest can be somewhat increased.

Angels are all powerful, but only within their own spheres of influence. Remember to always only petition the angel who rules specifically that for which you are working magic. To petition the wrong angel would be like asking a plumber to be your wedding photographer, they usually won't be able to help you. If you absolutely can't figure out which angel rules your desire, then you can work with Raphael, and ask him to bring your petition to the correct angel, as he is the messenger angel of Mercury.

When petitioning the angels directly, make your magical work space as beautiful as you can. Appropriate flowers, crystals, gems and colored candles are great ideas for beautifying your altar and making your angelic magic much more powerful and up-lifting. Burn the angel's incense or sprinkle the angel's perfume around the area if possible. Remember that correspondences work with the magical law of "signatures" and they help to line your deep mind, your surface mind, your aura and the energies you are invoking. If there are correspondences which do not make sense to you, then disregard them for now and work with ones that DO make sense to you.

In addition to working magic with the angels, it's also important to realize that all the different flowers, perfumes, stones, metals and such that are sacred to your birth angels, are also your own personal "lucky" symbols; therefore, you would be wise to begin to incorporate them not only in your magical workings, but into your own daily life.

The angelic symbols and calls signed included in this lesson are intimately connected with the vibratory energy of each particular angel with whom they correspond. In addition to the magical scripts you have been using, the call signs, planetary symbols and zodiacal symbols associated with each angel will give you a much closer connection to each angel; therefore, as you progress further in this work and begin to work with the angels directly, these symbols become essential tools for your use.

When petitioning an angel directly it is important to use their own personal call signs and the appropriate angelic script for each angel. Combining the call signs, with the magical scripts is very powerful. These symbols carry an ancient current which, when tapped into, is extremely powerful. Tapping into these powers becomes much more intense over time and with practice. You might think of using these symbols as a means by which you are moving into the causal plane where these powerful beings operate to help bring about new forms, ideas, experiences and relationships out of the matrix creative powers.

## Angelic Omens

Beings of higher realms from ours, communicate with us through our deep minds. This is because our deep minds are one with the Universal Mind. This Universal Mind is often referred to by the Jungian term, the "Collective Unconscious." Through your scrying work with your magic mirror, you are developing your clairvoyance, and thus, you may get to the point where you can have direct telepathic communication with some (or possibly all ) of the angels. However, even once you have reached that level of skill, your clairvoyant abilities may not be capable of tuning in with the angels directly at all times. Luckily, it is not necessary to have telepathic communication with the angels when you are working magic, because the angels communicate with those who petition them through *omens*.

Angelic omens come in many different forms including birds, insects, flowers, trees, gifts, etc. After you have completed an angelic petition, you should receive an omen during that angel's specified period of time. All omens should be completely spontaneous and unexpected. If you have not received an omen during the specified time, it usually means that your magical result is not forthcoming. If this is the case, your petition should either be rethought or reworded and then repeated in three months time (during the appropriate lunar phase), or abandoned altogether.

For instance, if you petitioned Michael for something, and within 7 days received a gift of oranges from someone (unsolicited), this is an omen that your petition was received and your magic is "in the works." A list of time frames and omens follows later.

Remember that for an omen to be taken seriously, it must be a sign specifically described in the angelic tradition, it must come within the specific time frame called for with that angel, and it must not be something that was in any way orchestrated by you.

## Writing Your Petitions

The paper which is used for angelic petitions must be square. It matters not what size the piece of paper is, but square it must be (the same size horizontally and vertically). Be certain that you cut your

paper into an exact square. The colors of paper and ink you choose will depend on the angel you are petitioning. I tend to use white paper and colored ink, and then color in the white background with crayon or colored pencil when necessary, rather than using colored paper. But using colored paper is absolutely fine too.

Remember to use the plural form of personal pronouns when writing your petitions. For example, write “please help us,” but avoid “please help me.” In addition to being a polite method of addressing the angels, it also helps you relate to being one with all the universe, rather than being all alone in it.

At the top of your square of paper, you will draw (in the appropriate angelic color) either three or four boxes depending on the angel you are petitioning. Within these boxes, you will also draw the planetary symbol of the angel, the symbol of the sign or signs of the zodiac the angel rules, and also their personal call sign. In the space beneath these boxes, you will write the appropriate greeting for the angel, followed by your petition, using the magical script specified for that angel. You will sign your name at the bottom of the petition using the appropriate angelic script for the angel you are petitioning.

Once you have written your petition, you may optionally place a candle on top of it and light the candle. Either let the candle burn down and out by itself (avoid leaving candles unattended), or you may burn the candle a bit each day until it burns out by itself. Burning a candle on top of your petition is optional, and is not required for this work.

You will then keep the petition for the length of time specified for the angel with whom you are working. Once the time has elapsed, you will destroy the petition either by tearing it up, or burning it. During the specified time you keep your petition before destroying it, you should receive one or more omen from the angel you petitioned, letting you know that your results are on their way. Whether or not you receive an omen, you will destroy the petition at the proper time.

There is no desire that cannot be granted, however sometimes you will not receive an omen. This means that your desire either simply needs to be rethought or reworded, or that you must wait to move forward with this desire because the time is just not right. Occasionally, certain desires must simply be abandoned, at least for a while, in order to either learn a particular lesson or to avoid a problem which is unforeseen by you.

Remember, if you don't receive an omen, let your goal rest for at least three months before you repeat your petition. When you do repeat your petition, make sure that you take stock of how you have worded it and how you might change your petition the next time to be more successful.

If, however, you have received an omen, you can be absolutely certain that your results are forthcoming.
